

Daniel McKay

CS453X Assignment 1

N	trainingAccuracy	testingAccuracy
400	82.75%	71.12%
800	80.25%	74.07%
1200	79.83%	74.95%
1600	78.88%	76.37%
2000	78.25%	76.42%

As n goes up, the training accuracy goes down, and the testing accuracy steadily goes up. This means that the two curves are inversely related.
